Testimonials

Hear from our **satisfied clients** about their experience with luova Design and how our **innovative solutions brought their ideas to life.**

4.6

Google Rating

Anup Kurup

"Working with Team luova was a fantastic experience. Their sharp eye for detail and innovative approach brought my vision to life. The team's dedication and expertise made the entire process smooth and enjoyable. Truly impressed with their work!"

Satyam K

"This is one the best Product design company. It's all about one thing ,creative, problem-solving to get the story out. The Environment of this company is outstanding, Great Employees, Ultimate Product Design work. Really Loved it. Especially I really Thanks to All Employees of this company because without them nothing is possible"

Trilok Nichlani

"Having worked with numerous other design firms, Vatsal and his team are hands down the best in the business. Honest, hard working and very professional. Money well spent! Thanks guys"

Amit Patil

Creative minds for Product Design and Development

Dhruv Dharamshi

"Vatsal and his team at luova quickly became our go-to for 3D modeling and rendering, delivering high-quality visuals for our marketing collaterals. Their patience and commitment to understanding our specific needs make them invaluable long-term partners. With fair pricing and exceptional service, I highly recommend them for any product design project."

GATIK NEO

Home Appliance | Pedestal fan

Elegant • Organic • Minimal

Gatik is a stylish pedestal fan with curved aesthetics, balanced round blades, and an ergonomic control panel for seamless functionality.

- ▶ Trims and curves inspired by a horseshoe
- ▶ Developed for Havells via OEM

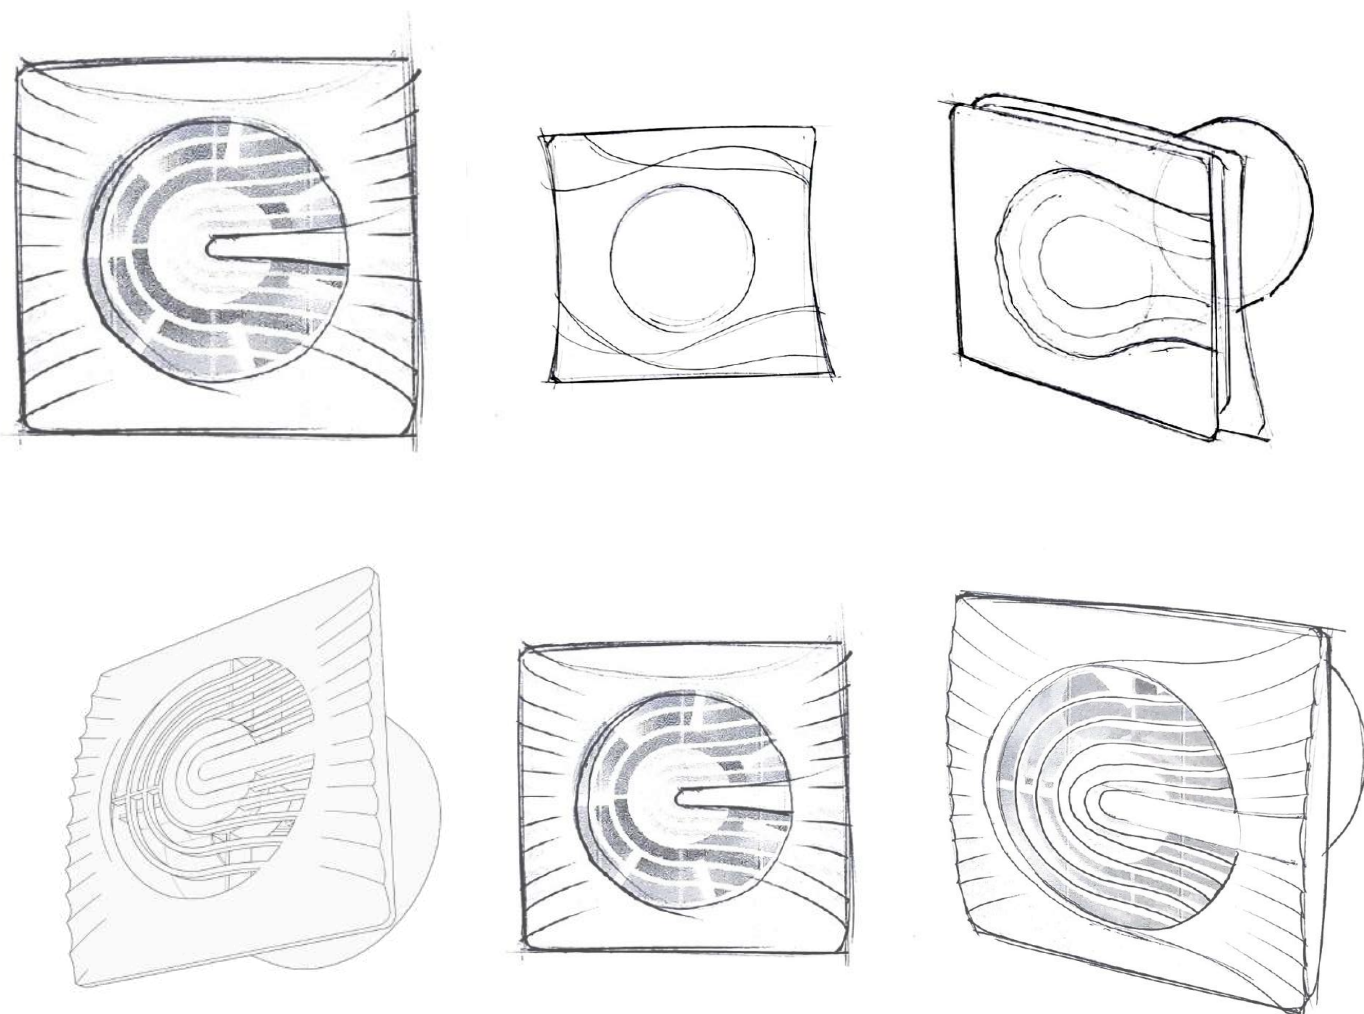

PAISELY

Home Appliance | Pedestal fan

Elegant • Organic • Modern

Paisley is a uniquely designed pedestal fan with a droplet-shaped form that doubles as a storage unit, blending cooling functionality with aesthetic and practical appeal.

- A hero product developed for Polycab
- A unique blend of technology and luxury
- Integrates a lamp, wireless charging, bookshelf, storage rack, and a smooth, sturdy, high-performance pedestal fan
- Fully ABS body construction

HIEN

Home Appliance | Exhaust Fan

Dynamic • Flowy • Robust

Hien is a stylish bathroom exhaust fan with a sleek design and rhythmic front fascia. It enhances aesthetics while efficiently ventilating moisture and odors.

- ▶ Designed and developed for Crompton
- ▶ Wave-inspired, fluid design

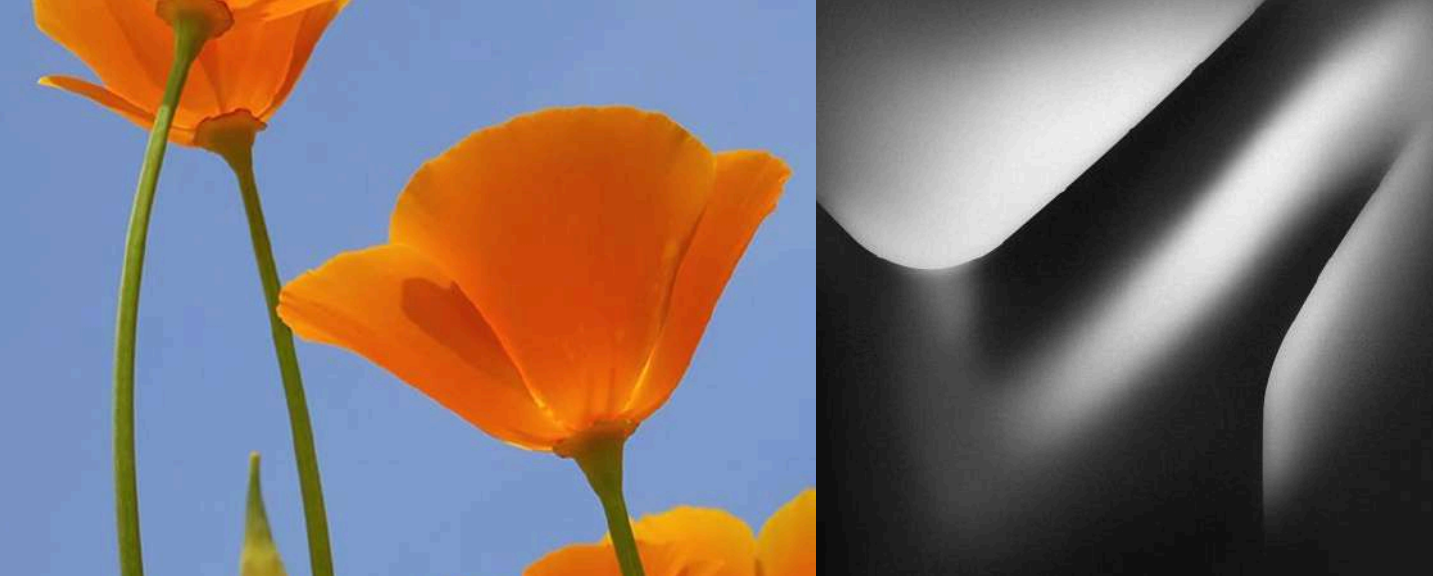

TULIP

Kitchen appliance | Mixer Grinder

Unconventional • Organic • Feminine

Tulip is a mixer grinder with graceful, tulip-inspired curves, combining elegance and functionality for a unique, organic appeal.

- Designed and developed for Reliance Digital
- Tulip-inspired, elegant form

FLORA

Kitchen appliance | Mixer Grinder

Balanced • Premium • Elegant

Flora boasts a unique, flower-inspired design that beautifully combines elegance with stability, creating a striking yet balanced look.

- ▶ Feature-rich mixer grinder
- ▶ Silent BLDC motor
- ▶ Multiple modes for chutney, smoothie, and more
- ▶ Jar and lid lock detection sensors
- ▶ Touch-capacitive control panel
- ▶ Pilot batch of 15 enclosure sets delivered to LUCAS TVS

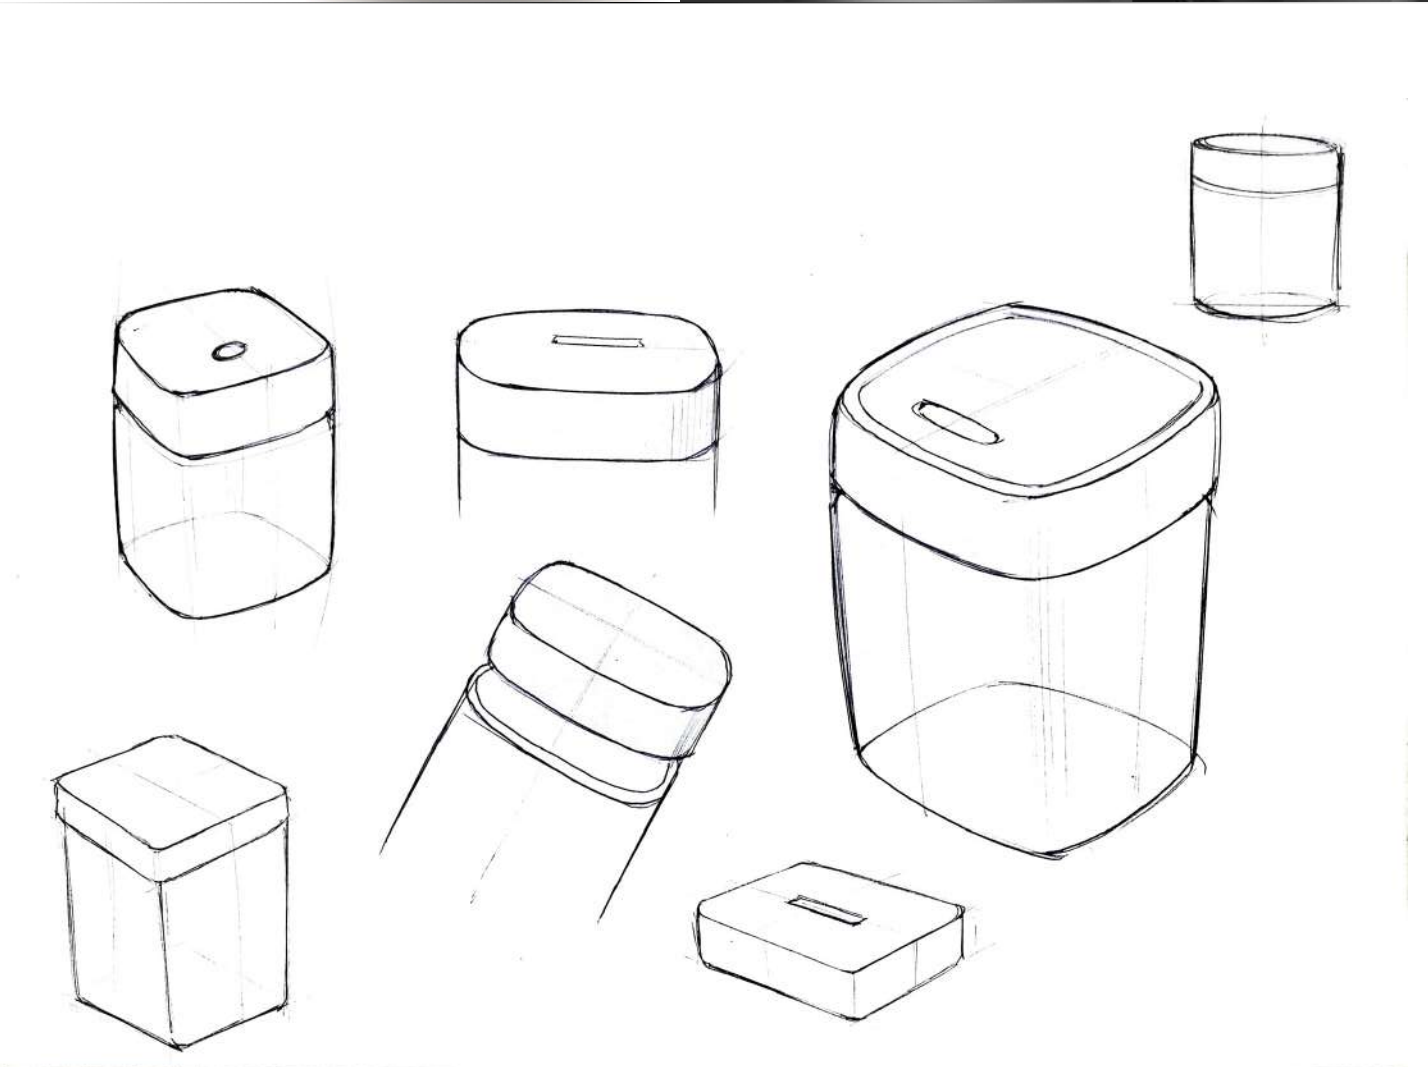

CRAVELOCK

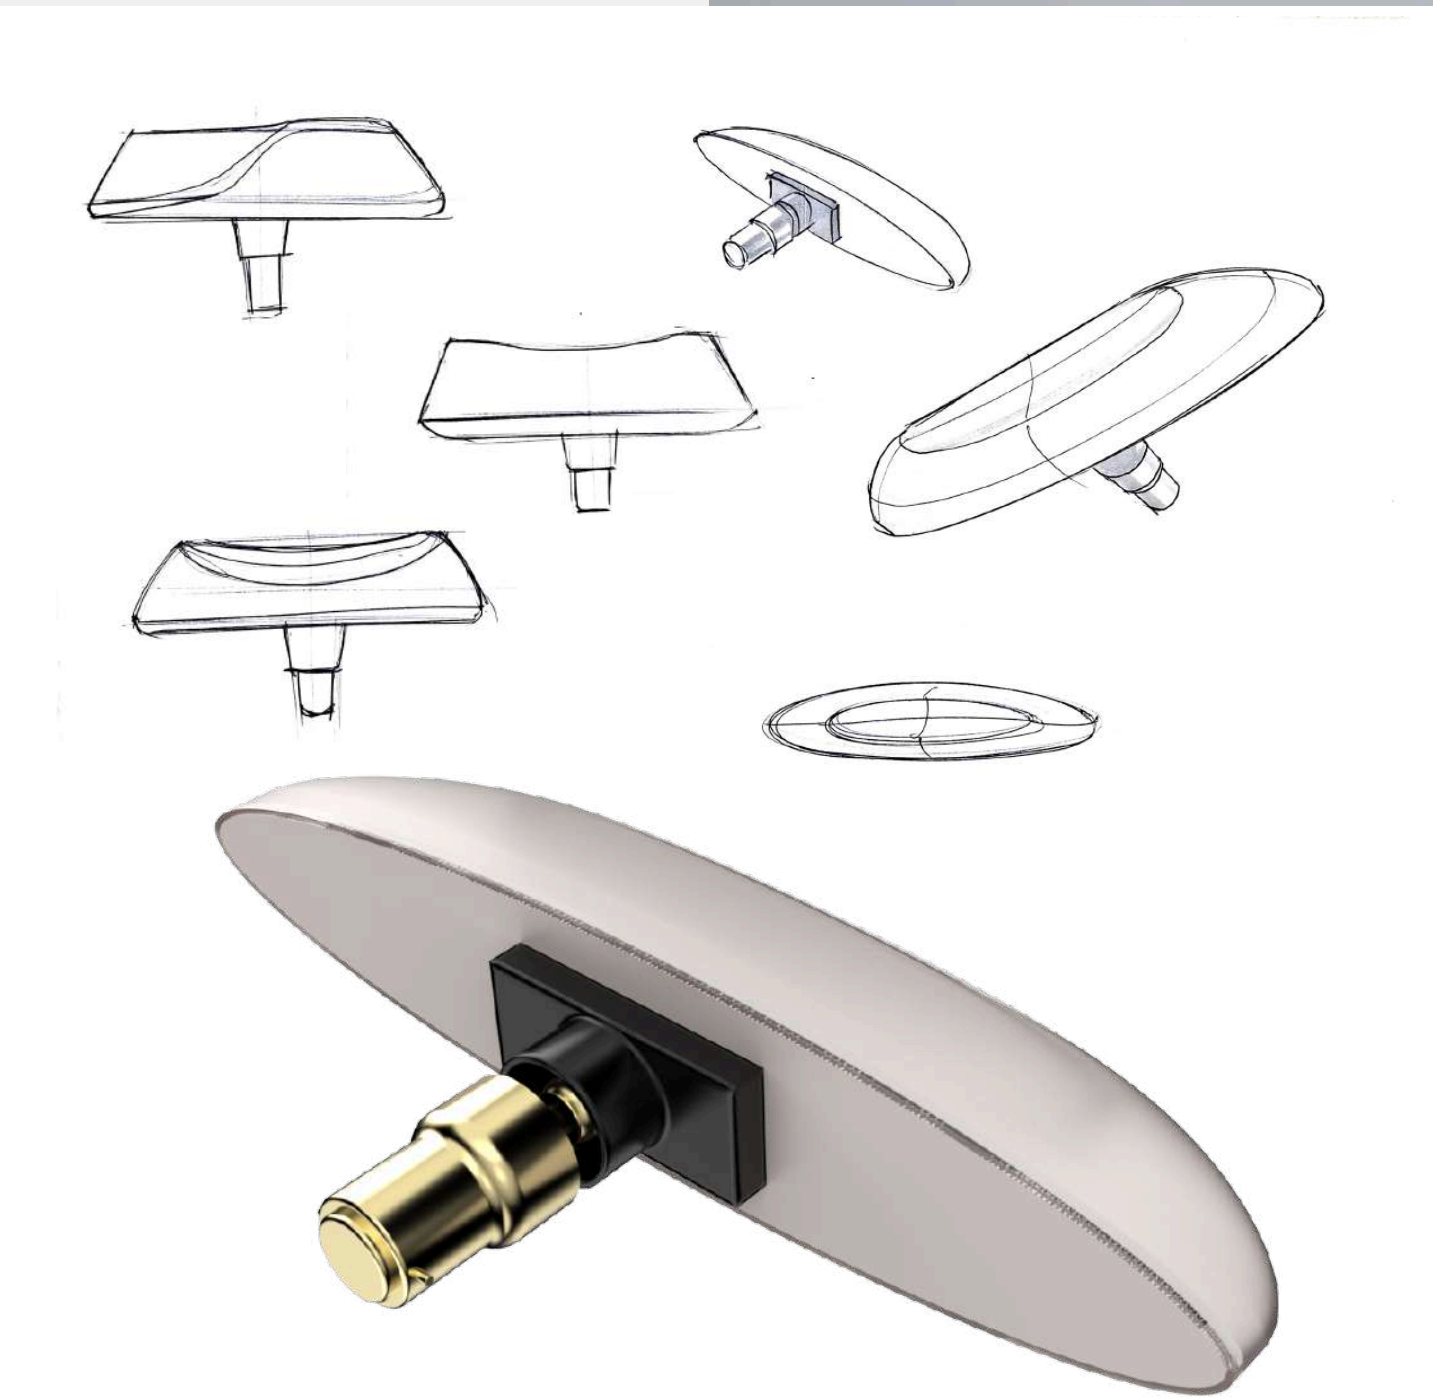

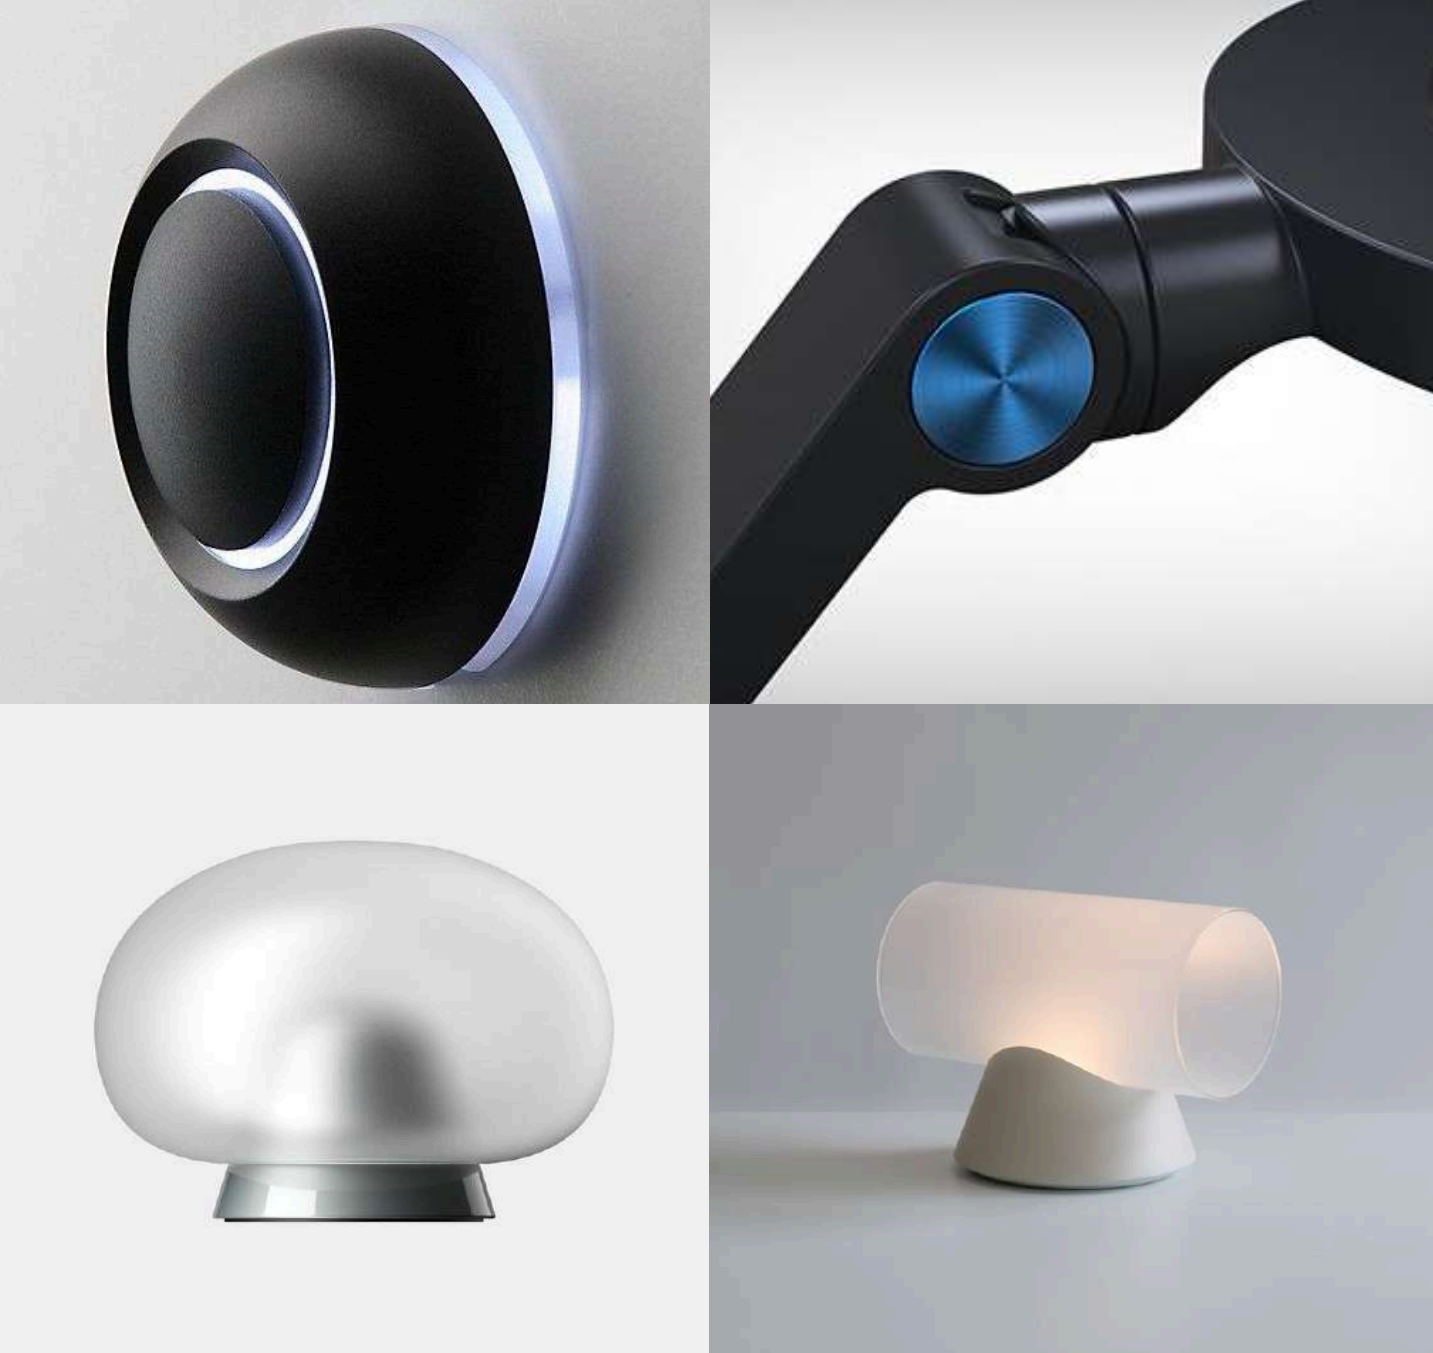

Consumer Electronics

Smart • Modest • Simple

Crave Lock is a smart utility device that helps users manage cravings with secure locking technology, keeping tempting treats out of reach.

- ▶ Designed to help control cravings and achieve personal milestones
- ▶ Store your desired items and set goals/timers via the app or onboard controls
- ▶ Developed for a U.S.-based client
- ▶ Use cases include:
 - Locking your phone or gaming device to stay focused
 - Storing treats that unlock only after you meet your goals

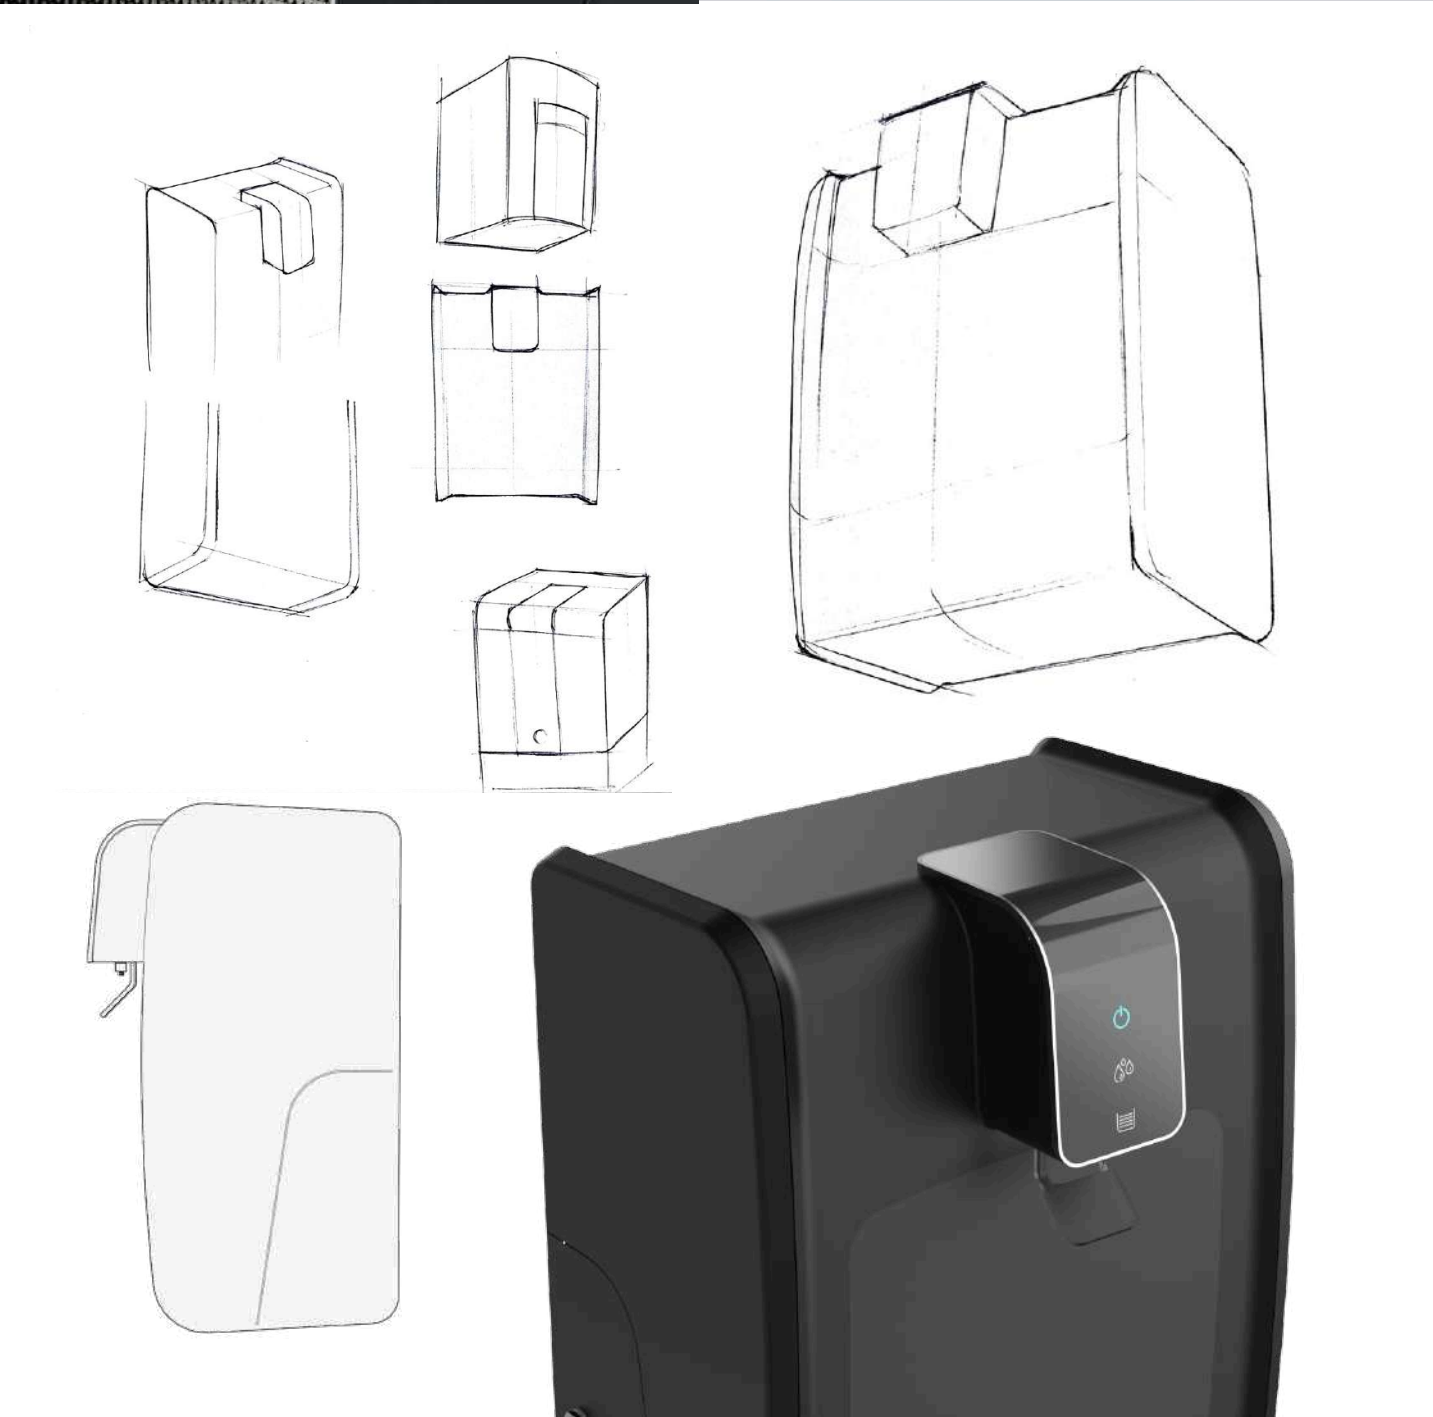

T-BULB

Consumer Electronics | Lighting

Unconventional • Elegant • Premium

T-Bulb is a premium horizontal lighting solution that combines elegance, durability, and energy efficiency. Its sleek design emits a warm glow, enhancing any space with sophistication.

- ▶ Designed and developed for Panasonic
- ▶ Explored alternative forms beyond the standard T-bulb shapes, resulting in options that worked remarkably well

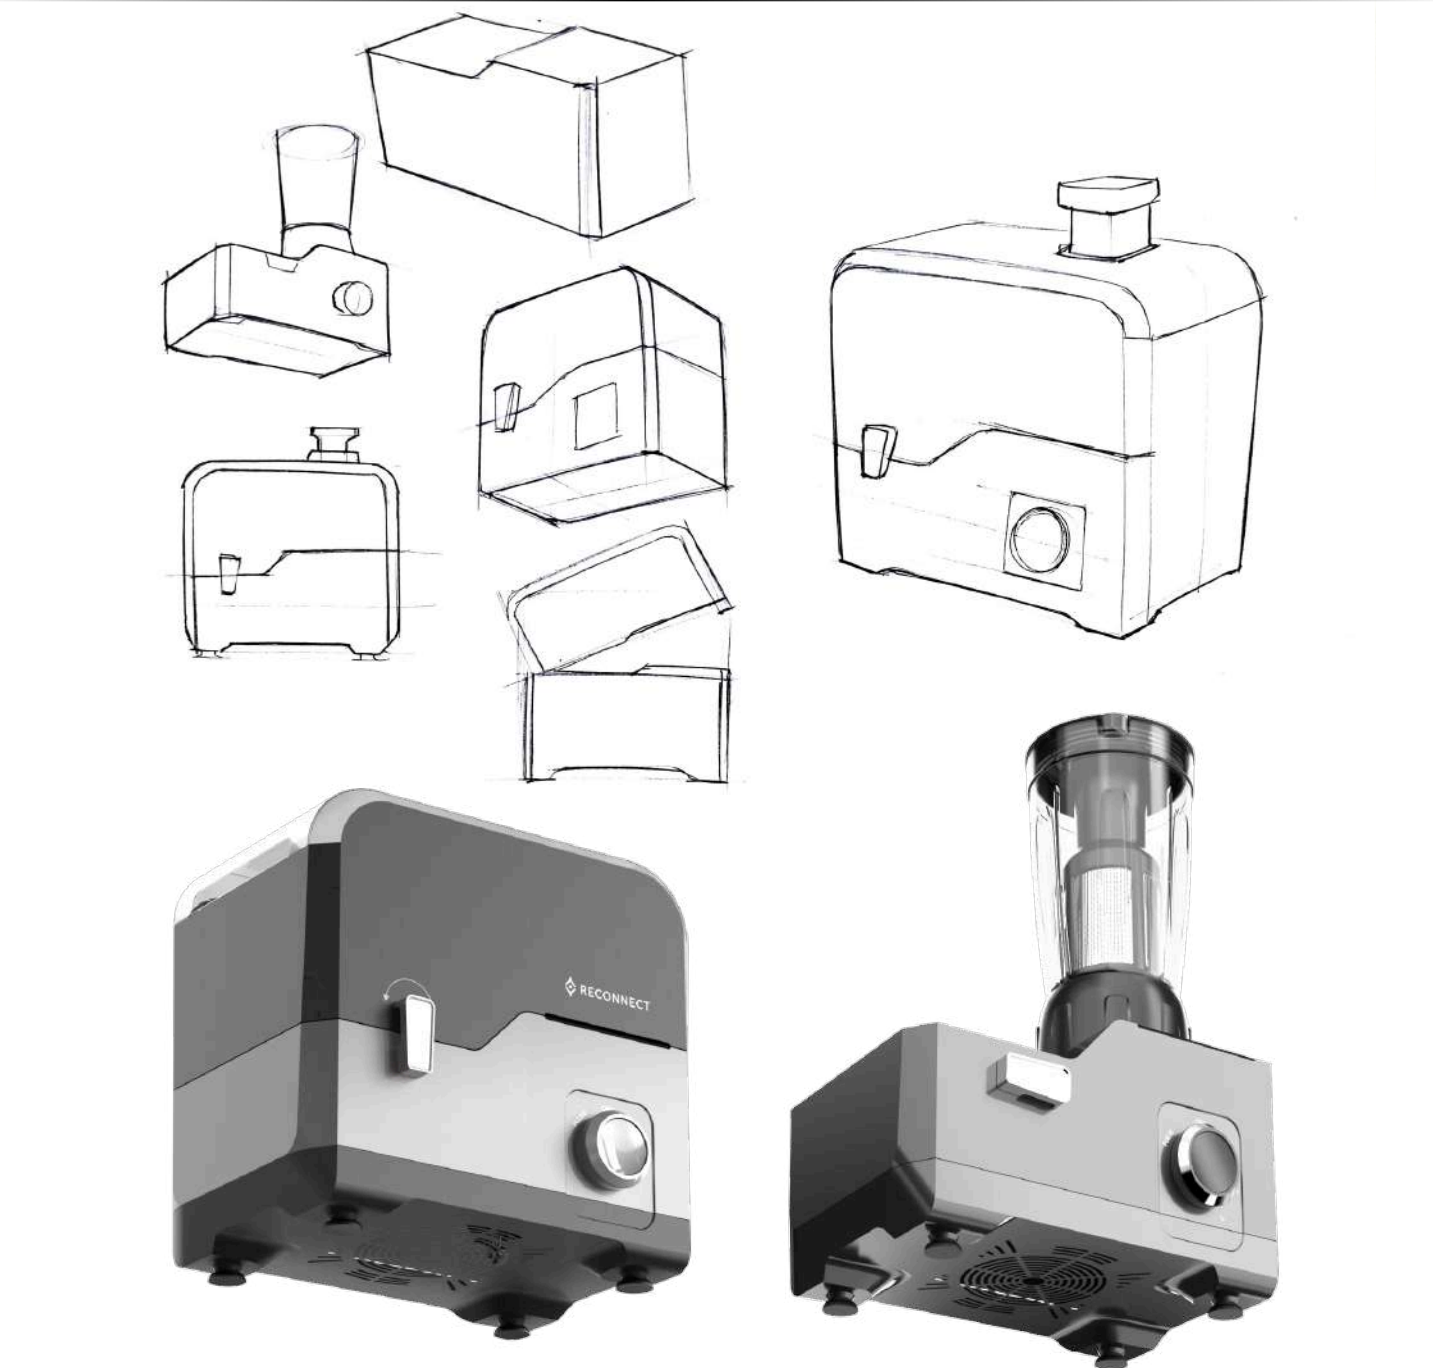

ZUVI

Kitchen appliance | Water Purifier

Clean • Smart • Classy

Zuvi is a sleek water purifier designed for both wall and countertop use. With smart dispensing and enhanced functionality, it provides clean water with style and convenience.

- Front facia redesign and integration of sensor based dispenser.

ACUTEOR

Kitchen appliance | Juicer Mixer Grinder

Versatile • Robust • Premium

Acuteor is a premium juicer mixer grinder (JMG) with an innovative design and superior functionality. Its unique top assembly ensures effortless operation, setting it apart from the rest.

► Inspired from automobile (canoo van)

DEMETER

Kitchen appliance | Coffee Maker

Sleek • Minimal • Professional

Demeter is a sophisticated coffee maker with a sleek, minimalist design and premium metallic accents. Its IoT integration and large touch display ensure a seamless, personalized brewing experience.

- Revamped an existing boxy, regular coffee dispenser
- Redesigned into a smooth, visually appealing coffee machine
- Achieved using sheet-metal construction with injection-moulded frames and panels

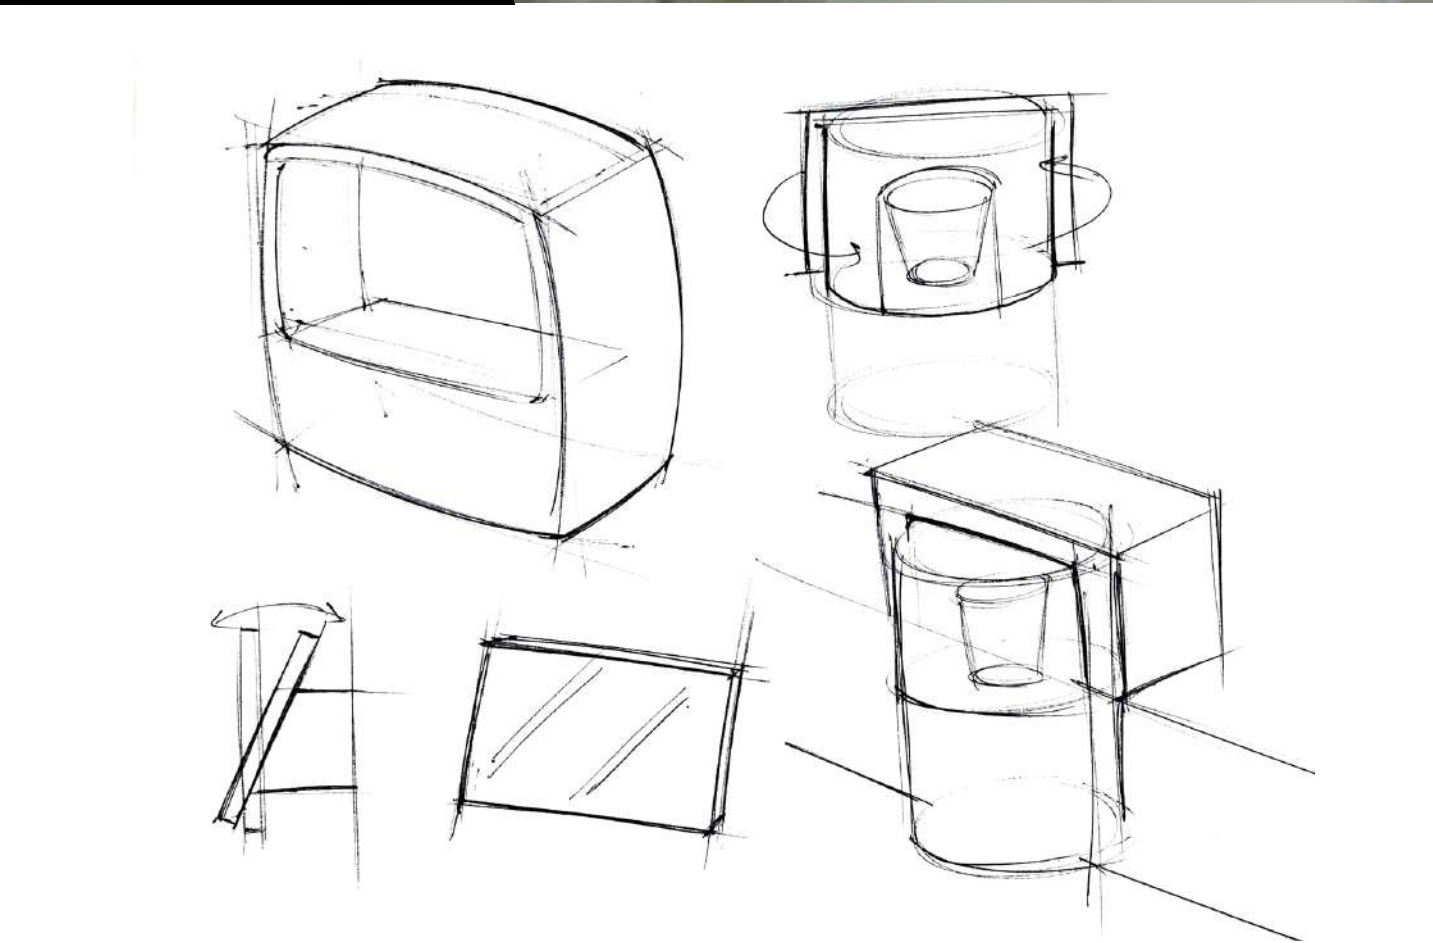

CHARGEGRID

Outdoor Products | EV Charger

Futuristic • Minimal • High - Tech

ChargeGrid is a cutting-edge EV charger with a sleek, intelligent design that seamlessly blends practicality, convenience, and sophistication.

- Transformed an old boxy sheet-metal enclosure into an aesthetically refined injection-moulded design to compete with rivals.
- Reorganized internal components and structural framing to optimize load distribution and functionality.

ROBOTIC BARISTA

Kiosk

Futuristic • Industrial • Techy

This robotic kiosk automates coffee ordering and serving. With a smart touchscreen and precise dispensing system, it delivers a quick, convenient, and consistent coffee experience.

- ▶ A concept developed for an U.S based client.
- ▶ A coffee counter that serves a choice coffee with help of installed robotic arm.

HelpMeSee | Cataractor Surgery Simulator & Case Study

Product overview

A hands-on eye-surgery simulator designed to help users accurately practice cataract extraction. It enhances precision, builds confidence, and improves surgical skills through realistic anatomy, instrument handling, and guided procedural steps.

But there are some Problems

PHYSICAL UNLOADING

- Calibration issues
- Wear and tear

FORKLIFT UNLOADING

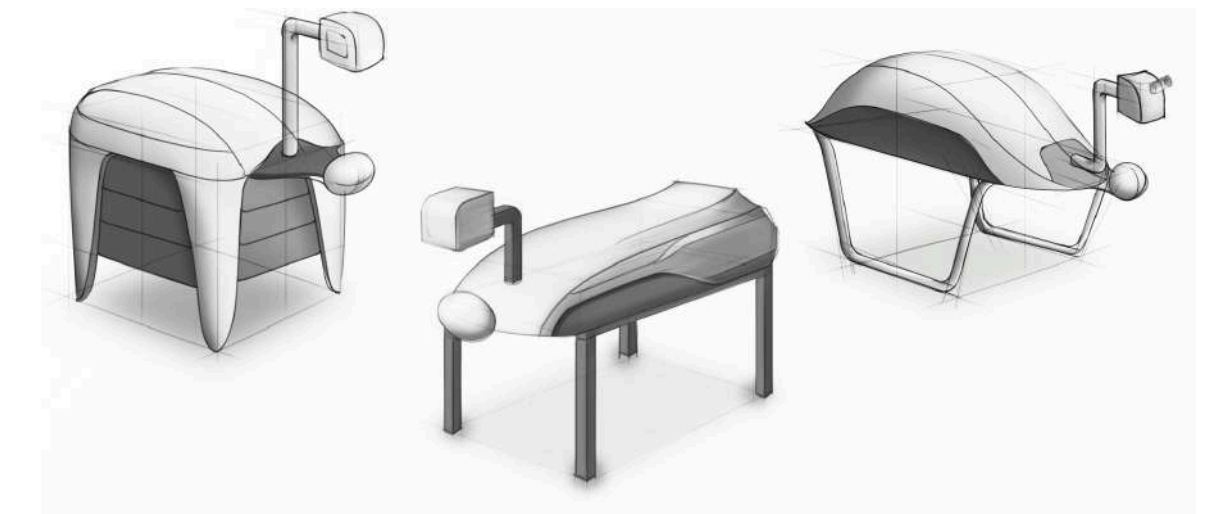

- High cost
- Time consuming
- Unavailability of forklift at all sites

PORTABILITY AND PHYSICAL UNLOADING

- Damage to the outer casing
- Calibration Issues Wear and tear
- Calibration issues
- Wear and tear

Preposed Solution

So they floated an **Query** to come up with an idea which can resolve mobility and portability issues yet cost effective solutions.

- The simulator developed by a Switzerland base company Moog Design who are expert in making aircraft simulators
- The existing simulator has been developed considering tier 1 cities where forklift and transport is easily available.
- But management saw people are using bare hands and physical unloading which cause damage and portability was major concern

-Our selected **Solution** is on next slide

HelpMeSee | First Product Delivered By IUOVA

- Redesigned with a modular structure
- Use of standard tubes and channels to control cost.
- FRP enclosure for enhanced aesthetics
- Up to 30% reduction in overall weight
- Easy installation without professional assistance

- Fully modular structure that packs into six portable boxes
- Enhanced mobility and logistics efficiency
- Reduced risk of transit damage

- RPT developed using metal structure and FRP panels to study and refine minute design changes
- The team rigorously tested the RPT to identify and resolve issues
- After successful validation, the first prototype was installed at the client's office
